AMK

ABOUT ME

I am a back-end developer with hands-on experience of working on software projects for 4+ years experienced with 30+ projects mostly in JVM and in startups and also medium enterprises. I started my career when I entered the university. Fast adaption and taking advantage of patterns are two of my key strengths.

JOB EXPERIENCE

Software Engineer

Divar

Sep 2022 – Ongoing

Tehran, Iran

- Back-end developer
- Divar is the leading application in the trade business of second-hand goods, job panels, and real-state markets in Iran with 50M++ users. A large enterprise with multiple technical teams working on a microservice project. I work on the maintenance and reliability of the website for showing posts to the users.
